## POTASH WEST NL CORRECTED NAME CHANGE TO: PARKWAY MINERALS NL

Following the AGM held 29 November 2016 and ASIC approval, Potash West NL has changed its name to: **PARKWAY MINERALS NL**. The ASX code remains unchanged as **PWN**.

Managing Director Patrick McManus commented " The name change reflects the importance of phosphate and other minerals in the value proposition of our Dandaragan Trough project area. In our flagship Dinner Hill project, phosphate is the principal revenue stream"

**About Parkway Minerals**

*Parkway Minerals (ASX:PWN) is an exploration company focused on developing large greensand deposits in West Australia's Perth Basin. The Company aims to define a substantial resource base and investigate how best to recover phosphate, potash and other minerals from the Dandaragan Trough. The project is well situated in relation to infrastructure, with close access to rail, power and gas. A successful commercial outcome will allow the Company to become a major contributor to the potash and phosphate markets at a time of heightened regional demand.*

*The Company has a major land holding over one of the world's largest known glauconite deposits, with exploration licenses and applications covering an area of over 2,082km<sup>2</sup>. Previous exploration indicates glauconite sediments are widespread for more than 150km along strike and 30km in width. Current JORC compliant Indicated Mineral Resources stand at 250Mt at 2.9% P<sub>2</sub>O<sub>5</sub> of phosphate mineralisation and 175Mt at 4.2% K<sub>2</sub>O, amenable to processing by the K-Max process (ASX release:3 June 2015). A pre-feasibility study is in progress for stage 1, production of phosphate fertilisers.*

*The Company has 55% of a potash exploration project in the South Harz region of Thuringia, in Central Germany. The region has been a potash producing area for over 100 years.*
